MICPA TAXATION

Introduction

This paper is designed to provide students a thorough understanding of the fundamental concepts and principles of the Malaysian taxation system and the relevance of taxation to personal and business decision making.

Students are expected to display an in-depth understanding of the impact of all major taxes on the transactions of individuals, companies and special undertakings and be able to identify, discuss and advise on the tax issues in a particular situation as well as planning opportunities to minimise potential tax liabilities.

At the advanced stage, students must not only be fully conversant with the Malaysian income tax system but also a good understanding of real property gains tax, investment incentives and indirect taxation.

Module learning outcome

By the end of this module, students should be equipped with:

- (a) An in-depth knowledge and understanding of the concepts and principles of Malaysian taxation.
- (b) The ability to solve practical problems which draw on the interaction of different taxes as well as case law.

Module requirements

The weightings of assessment for the module are:

Project	20% (marked out of 20)
Exam	80% (marked out of 80)
To pass a technical module, candidates must meet the following requirements: <ol style="list-style-type: none">1. Pass the exam by achieving at least 40 marks out of 80 and;2. Pass the module overall by achieving at least 50 marks out of 100.
