INTRODUCTION

Compliance with the ISQM1 is a continuous journey helping firms proactively manage audit quality. The journey of implementing this new quality management standard has inevitably posed challenges to firms. This Engagement Session aims to discuss challenges faced during the implementation of ISQM1, accompanying with the proposed solutions.

In addition, monitoring, remediation and evaluation, including root-caused analysis, are also topics to be covered at this Engagement Session, as these are central to the success of this new quality management approach. Understanding the root-cause helps firms effectively take action to prevent recurrence of negative outcomes and to promote recurrence of positive ones, aimed at improving audit quality.

Come and join us to equip yourself for continuous improvement beyond the initial implementation of the ISQM1.
